

Upgrade Puppet Enterprise

Puppet Enterprise 2019.8 LTS enables you to automate and manage more infrastructure with greater efficiency but when should you upgrade and what does that process look like?

Virtual Hands-on Workshop: Puppet Enterprise Upgrade

In this virtual hands-on workshop you'll delve into the upgrade process including planning and coordinating the upgrade, backing up your Puppet data, completing the upgrade, and rolling back. You'll leave the workshop having completed an upgrade from PE version 2018.1 to version 2019.8.

On-Demand Tech Talks

Listen as Puppet engineers talk about what's new and how to prepare for the upgrade.

[What's New and Assessing the Level of Effort](#)

Learn about the evolution and innovation of PE from PE 2015 to 2019.8 and find out what's new in PE 2019.8. Plus, learn how Puppet can help to establish a clear upgrade path and how to use a Bolt plan to estimate the level of effort to upgrade based on your current environment.

[Puppet Enterprise: Update or Upgrade?](#)

Deciding whether to upgrade or update is influenced by many factors. We'll guide you to make the best choice for your organization as well as show you how to upgrade PR version 2018.1 to version 2019.8

Let us help you

Our Puppet Upgrade Service is designed to help customers upgrade their PE installation to the most current PE release, leveraging best-in-class methodology and tooling to simplify the upgrade process.
